

RIBOCARE®

Product Description and Purpose

RIBOCARE® bed sheet consists of a liquid-proof foil and several cellulose layers, covered by a non-woven which is closed on all sides. The bed sheet is used for the care of incontinence patients. In addition to that, it also serves as protection for the bed when moist wound dressings are used or dressings are changed. The cellulose layers safely absorb liquids. The foil prevents the liquids from discharging and so protects the bed-linen from becoming soiled. RIBOCARE® supports the nursing staff in the hospital as well as in the domestic home care of outpatients.

Composition

Cellulose, polyester, polyethylene

Normative and Legal Requirements

RIBOCARE® is a medical product in accordance with the MDD, class I, rule 1, and complies with the requirements of the directive 93/42/EEC.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

Packaging

Primary packaging: PE bag

Secondary packaging: carton made of cellulose

Storage

To be stored in a dry and dust-free environment
