RUDACLUDE®

Product Description and Purpose

The sterile, oval eye plaster is provided with a black, opaque layer above which there is a white, soft wound contact layer. RUDACLUDE® has a circumferential adhesive surface so that the eye is optimally protected. The eye plaster can, in sterile condition, be used in the OR. It is especially suited after operations when light must be prevented from shining into the eye for a specific time. Also suited for strabismus (squint) to cover one eye.

Composition

Polyester, viscose, polyacrylate adhesive

Normative and Legal Requirements

RUDACLUDE® is a medical product in accordance with the MDD, class Is, rule 4, and complies with the requirements of the directive 93/42/EEC.

Sterilization of the product complies with DIN EN 11137.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

Packaging

Primary packaging:	paper-paper packaging
Secondary packaging:	folding box made of cellulose
Tertiary packaging:	carton made of cellulose

Storage

To be stored in a dry and dust-free environment, protected against direct sunlight
