

## RUDA VEN<sup>®</sup>-plus

### Product Description and Purpose

This plaster is especially suited for the fixation of permanent venous cannulas. It consists of a white adhesive non-woven fabric which is provided with a wound contact layer. RUDA VEN<sup>®</sup>-plus protects the puncture site against the penetration of pathogenic germs. An extra non-woven cut is used for the padding of the cannula. The plaster is coated with a hypoallergenic polyacrylate adhesive which ensures a secure fixation of the venous cannula. The edges are rounded to prevent the plaster from rolling up. RUDA VEN<sup>®</sup>-plus is sterile and individually packed.

### Composition

Viscose, polyester, polyethylene, polyacrylate adhesive

### Normative and Legal Requirements

RUDA VEN<sup>®</sup>-plus is a medical product in accordance with the MDD, class Is, rule 4, and complies with the requirements of the directive 93/42/EEC.

Sterilization of the product complies with DIN EN 11137.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

### Packaging

Primary packaging: paper-paper packaging

Secondary packaging: folding box made of cellulose

Tertiary packaging: carton made of cellulose

### Storage

To be stored in a dry and dust-free environment, protected against direct sunlight
