

# NOBA Verbandmittel

Danz GmbH u. Co KG

## NOBAFILM®

### Product Description and Purpose

NOBAFILM® is a sterile, highly flexible incision film made of a transparent, hypoallergenic polyurethane foil which is coated with a hypoallergenic adhesive. NOBAFILM® is waterproof, but steam and air permeable. It is used to cover the operation area in a sterile way. Owing to the fingerlifts at both sides, the operation area can be optimally covered. The incision film prevents pathogenic patient dermal germs from penetrating into the surgical wound. Microorganisms cannot permeate the film. This minimizes wound infections.

### Composition

Polyurethane foil, polyacrylate adhesive

### Normative and Legal Requirements

NOBAFILM® is a medical product in accordance with the MDD, class Is, rule 4, and complies with the requirements of the directive 93/42/EEC.

Sterilization of the product complies with DIN EN 11137.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

### Packaging

Primary packaging:	paper-film packaging
Secondary packaging:	folding box made of cellulose
Tertiary packaging:	carton made of cellulose

### Storage

To be stored in a dry and dust-free environment, protected against direct sunlight
