

NOBALASTIK[®]-Hospital

Product Description and Purpose

The medium stretch bandage has a stretchability of approx. 90 %. By means of this bandage all sorts of splints can be fixed. It exerts a supporting and compressing effect in the case of sport injuries. In surgery it is used, for example, for thorax compression in cases of rib fractures or for the stabilization of wound bandages. In the area of phlebology the bandage is employed, owing to its easy handling, to support treatments.

Composition

Cotton, polyurethane, polyamide
