

NOBALASTIK[®]-cohesive

Product Description and Purpose

The medium stretch bandage has a stretchability of approx. 80 %. Due to a latex coating the bandage is cohesive and can therefore not slip out of position once it has been applied. NOBALASTIK[®]-cohesive exerts a supporting and compressing effect in the case of sport injuries. In surgery it is used, for example, for thorax compression in cases of rib fractures or for the stabilization of wound bandages. In the area of phlebology the bandage is employed, owing to its easy handling, to support treatments. The bandage contains latex which may provoke allergic reactions.

Composition

Cotton, polyurethane, polyamide, latex

Normative and Legal Requirements

NOBALASTIK[®]-cohesive is a medical product in accordance with the MDD, class I, rule 1, and complies with the requirements of the directive 93/42/EEC.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

Packaging

Primary packaging: folding box made of cellulose

Secondary packaging: carton made of cellulose

Storage

To be stored in a dry and dust-free environment, protected against direct sunlight
