

NOBASTRETCH[®]-fein

Product Description and Purpose

The brown, fine woven, long-stretch compression bandage has a stretchability of 170 % and is permanently elastic. Owing to its excellent stretchability and good reset power the bandage is suited for the compression and support of the muscle and movement apparatus, since an individually adapted high resting pressure can be obtained. Particularly applicable for convalescing patients whose diseased or injured regions should not be burdened. Sports injuries are the most common utilization area here. In phlebology or internal medicine the bandage helps to flush oedema out of the lower extremities. NOBASTRETCH[®]-fein can also be used for compression bandages in phlebology, as thrombosis prophylaxis, and for the after-treatment of venous diseases. Due to the high resting pressure of long-stretch bandages it is not recommended to leave the bandage applied overnight.

Composition

Cotton, polyamide, polyurethane

Normative and Legal Requirements

NOBASTRETCH[®]-fein is a medical product in accordance with the MDD, class I, rule 1, and complies with the requirements of the directive 93/42/EEC.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

Packaging

Primary packaging: folding box made of cellulose

Secondary packaging: carton made of cellulose

Storage

To be stored in a dry and dust-free environment, protected against direct sunlight
