

NOBA Verbandmittel

Danz GmbH u. Co KG

NOBAFORM[®]

Product Description and Purpose

NOBAFORM[®] is a fixed plaster bandage which has been manufactured without the use of solvents. Owing to its properties, such as excellent shapeability and easy finishing, the plaster bandages are likewise suited for the treatment of reduced fractures (as a split plaster), as well as for their after-treatment (as a circular cast bandage). They can also be used for the temporary immobilization of inflammatory processes such as for example epicondylitis humeri, tendovaginitis or bursitis. Due to the plaster's longer open time it is easy to process. Please refer to our brochure "KNOWLEDGE CONNECTS" for more information and typical applications.

Composition

Cotton, gypseous alabaster, (calcium sulphate semi-hydrate)

Normative and Legal Requirements

NOBAFORM[®] is a medical product in accordance with the MDD, class I, rule 1, and complies with the requirements of the directive 93/42/EEC.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

Packaging

Primary packaging: PE coated paper

Secondary packaging: folding box made of cellulose

Tertiary packaging: carton made of cellulose

Storage

To be stored in a dry and dust-free environment
