

NOBA Verbandmittel

Danz GmbH u. Co KG

NOBALITE[®]

Product Description and Purpose

The synthetic cast bandage is individually packed. If the bandage is immersed in water and pressed firmly several times, the material of the applied bandage will harden very quickly. This results in a rigid cast bandage with an enormously high stability and low weight. The good X-ray transparency necessitates fewer bandage changes when controlling the healing process.

The material is used for treatment of bone fractures of various origins or for treatment of inflammatory processes at the joints and ligaments.

Composition

Fibreglass, polyurethane resin

Normative and Legal Requirements

NOBALITE[®] is a medical product in accordance with the MDD, class I, rule 1, and complies with the requirements of the directive 93/42/EEC.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

Packaging

Primary packaging: aluminium coated bag

Secondary packaging: carton made of cellulose

Storage

No specific storage conditions to be observed
