

## PFLEGEKITTEL

### Product Description and Purpose

The yellow protection gown is made of non-woven. Its frontside and the arms are liquid-repellent and impermeable to blood and viruses. Arm cuffs facilitate the donning of disposable gloves. The yellow color exerts a signal effect for the user in the nursing of MRSA and VRSA patients. The product is pre-sterilized.

### Composition

Polypropylene, polyethylene (front and arms)

### Packaging

Primary packaging: PP bag

Secondary packaging: carton made of cellulose

### Normative and Legal Requirements

Pflegekittel (protection gown) is a medical product in accordance with the MDD, class I, rule 1, and complies with the requirements of the directive 93/42/EEC.

The impermeability of the protection gown's front and arms against liquids, blood, bacteria and viruses has been proven in accordance with ASTM F 1670 "Synthetic Blood Test", ASTM F 1671 "Viral Penetration Test" using the bacterium Phi-X 174, ASTM F 739 & AAMI PB 70-AATC 127 "Permeation and Penetration test for liquids".

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

### Storage

To be stored in a dry and dust-free environment
