

NOBA Verbandmittel

Danz GmbH u. Co KG

NOBACUTIS® Swabs

Product Description and Purpose

The carrier material of the sterile ointment swab without additives is a binder-free non-woven. The swab is coated with white vaseline (Vaselinum album as per DAB). The ointment base is water repellent (hydrophobic) and not sensitizing. The swab does not adhere to the wound, thus allowing an atraumatic change of dressing and at the same time greatly reducing the pain for the patient. NOBACUTIS® is packed individually and sterile.

Composition

Cotton, polyester, vaseline (vaselinum album as per DAB [German pharmacopeia])

Normative and Legal Requirements

NOBACUTIS® is a medical product in accordance with the MDD, class Is, rule 4, and complies with the requirements of the directive 93/42/EEC.

Sterilization of the product complies with DIN EN 11137.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

Packaging

Primary packaging: PET film

Secondary packaging: aluminium-coated paper

Tertiary packaging: folding box made of cellulose

Quarternary packaging: carton made of cellulose

Storage

To be stored in a dry and dust-free environment, protected against direct sunlight, temperature must not exceed 25°C
