Danz GmbH u. Co KG

NOBAALGIN®

Product Description and Purpose

NOBAALGIN® dressing consists of sterile, soft and very absorbent calcium alginate fibres. As soon as NOBAALGIN® gets in touch with wound exudate, an ion exchange process takes place. The firm fibre is modified into а moist NOBAALGIN® is indicated for heavily exudating or bleeding wounds, in particular for: ulcus cruris, ulcerating carcinoma. decubital ulcera. lacerations and abrasions, skin donor sites. Bacteria and debris contained in the exudate will be embedded by the gel structure. The dressing can be painlessly. changed Remaining leftovers of fibre or gel at the wound edges will disintegrate themselves, but can also be removed with sterile saline solution.

Composition

Calcium alginate fibres
