

## EINWEG-BAUCHTUCH

### Product Description and Purpose

The unsterile pre-washed laparotomy sponge consists of several layers of gauze, which have been sewn up, and of a worked-in X-ray thread. If equipped with loop, it is 30 cm long. In operative areas the laparotomy sponge is used to absorb blood and secretion or to protect soft tissue or organ tissue. Disposable laparotomy sponges must be sterilized before use.

### Composition

Cotton, barium sulphate, PVC, DINP

### Normative and Legal Requirements

Laparotomy sponges are medical products in accordance with the MDD, class IIa, rule 7, and comply with the requirements of the directive 93/42/EEC.

Laparotomy Sponges comply with the requirements of EN 14079, type 20.

The product does not contain dangerous toxic substances according to REACH. It has CE marking and EN 980 labels on all its packaging.

### Packaging

Primary packaging: PE pouch

Secondary packaging: carton made of cellulose

### Storage

To be stored in a dry and dust-free environment.
